

## Computing Mission Statement.

At Millhouse, we have a bespoke Computing curriculum that is designed to instil within our pupils a passion for computing, coding and all things related to information technology. We also ensure that by the end of year 6, they are equipped with a variety of skills to be able to adapt and thrive in the rapidly changing world of IT in KS3 and beyond.

Our curriculum is split into three strings of learning: computer science, which is the study of the use of and principles of computers; digital literacy, which is the ability for the children to be able to find, consume and create digital content and E-safety, which covers safe and responsible use of technology.

Each year, the topics and lessons are designed to build upon the previous learning, revisiting and reinforcing key skills, whilst also showing clear progression. Emphasis has been placed on ensuring that pupils are not just learning how to use a particular platform or programme but are instead using these platforms to learn key skills and concepts which can be utilised across a multitude of platforms.
